

Specialty & Limited Access Drug List

This document lists specialty drugs managed in the FairoRx Specialty Drug and drugs that can only be filled at specific pharmacies. Specialty drugs are listed in blue text. Most specialty drugs are available through our preferred specialty pharmacy, US Bioservices. Your plan may require you to fill specialty medications at US Bioservices. Limited distribution specialty drugs (LDD) are only available through select specialty providers as determined by the drug manufacturer. Access to limited distribution drugs is available through other specialty pharmacies in the FairoRx Specialty Drug Program. Medications on this list in orange text may be filled at a retail network pharmacy other than Walgreens. **Note:** Some of the medications listed may not be covered under your pharmacy benefit or specific coverage requirements may apply.

Orange= drugs fillable at a retail network pharmacy other than Walgreens
 Blue= specialty drugs fillable at US Bioservices or Limited Distribution Pharmacy [special copay(s) may apply]
